Al Loeffelholz joined us on Monday and discussed Hands-Only CPR -- a technique that keeps the heart pumping until Paramedics can take over. Hands-Only CPR can be just as effective as conventional CPR.

The technique is simple -- direct someone to call 911 and start compressions. Position your body so that your shoulders are directly over your hands.

1. Ensure the person is on their back on a firm, flat surface 2. Kneel beside the person 3. Use correct hand placement 4. Use correct body position 5. Give continuous compressions. Push hard and fast (at least 2 inches; 100 to 120 compressions per minute).

YOU can save lives and make a difference. CPR, if performed immediately, can double or triple a cardiac arrest victim's chance of survival.

The Four-Way Test

1. Is it the truth?
2. Is it fair to all concerned?
3. Will it build good-will and better friendships?
4. Will it be beneficial to all concerned?
