Section D: Volunteer opportunities

Rotary is a service organization. Please describe any ongoing volunteer opportunities and/or short-term projects we could help you with

.

Rotary Club of Fergus-Elora – Donations Policy – DEADLINE APRIL 30th, 2026

All Applications need to be received before or on Wednesday APRIL 30th, 2026 by 5pm.

A) By Submitting this application we have your permission to list your Charity Name on our announcement of Charities funded – note we do note disclosure dollar amount

B) We will give highest priority to funding requests that meet these general guidelines:

This club usually undertakes projects each year in which we desire to be a major contributor.

Projects require a specific completion target date. We usually do not get involved in on-going operational funding, but we may consider funding the start-up phase of a new community service with an on-going mandate.

Funding of salaries for a specific project goal will be considered.

We prefer projects that will help a large number of persons but will consider large and small projects in which one person receives direct benefit.

We focus on projects that are of general benefits to the community, with particular attention being paid to those who are most disadvantaged in the community and guidelines as follows:

- How it will benefit our communities
- Number of people affected – Amount of money involved

We strongly support Rotary sponsored international projects, youth development programs and exchange programs.

We support projects which have a high probability of completion, subsequent success.

C) We give lower priority to request that meet these guidelines:

School organized trips for Bands, out of town sporting events, etc. We expect most of such funding should come from students raising funds themselves and from parents. This does not preclude the support of disadvantaged individuals.

As a club we generally do not support funding requests for large Charitable Organizations with established fund-raising machinery of their own.
