You Can Help us Make a Difference in the Health of Guatemalan Families!

Whether it's \$10 or \$10,000, your tax deductible donation to the Monterrico Community Clinic and Educational Center will leave a lasting legacy of health in Monterrico, Guatemala. Please help us make our dream of a clinic and education center a reality.

I would like to make a tax-deductible donation to Monterrico Community Clinic and Educational Center in Guatemala.

Map of Guatemala

Where is Monterrico?

Located on the Pacific Coast of Guatemala, the community of Monterrico is populated by the working poor. The villages in the surrounding area have no sewers or toilets, and no systems for water purification or sanitation.

There is no garbage collection. The villages consist of 22,800 families living primarily at a subsistence level.

Why Build a Clinic?

Less than 10 percent of Monterrico's people have access to health care. The nearest public clinic is about one and a half hours away and is staffed only intermittently by a nurse. The nearest public hospital is two hours away in the opposite direction.

To meet the health care needs of these people, the Rotary Club of Lake Stevens has launched a campaign to raise \$85,000 to construct a 1,518 square foot medical and dental clinic and education center in Monterrico.

The Community

The local Guatemalan community has been closely involved in planning this clinic, primarily through the efforts of the Centro Cristiana Cultural de Guatemala, (CCCCG) a non-profit based in Guatemala that supports the many health and education needs of the Guatemalan community.

The CCCC is partnering with Healing the Children of Oregon and Western Washington, and has the endorsement of the Rotary Club of Vista Hermosa in Guatemala City. They will work in conjunction with the local Ministry of Health to provide the following services:

- ◆ Prenatal, Newborn and Pediatric Care
- ◆ Pharmacy
- ◆ Dental Care
- ◆ Immunizations
- ◆ Procedure Rooms
- ◆ Laboratory

Included in the first floor of the facility is an education center for teaching midwifery, public health, and workplace and economic development training. The facility also hosts a birthing center, acute care beds and surgery suite. In the future plans are to add second floor training center and a waiting area.

The community of Monterrico, Guatemala is ready to provide the labor to build the clinic, but they do not have the money to fund construction of the facilities. This is why your financial support is so important.

PHASE ONE—CLINIC BUILDING @ \$85,000

OCTOBER 1, 2010—COMPLETED

- ◆ Foundation/First Floor \$12,500
- ◆ Support Beams/Roof structure \$ 5,000
