Classification Talk: Doug Kinley

continued from Page 1

An ordinary day on the ranch starts at 06h: 00 where 150 trail riding horses have to be saddled. The day ends when the horses return around 16h: 00 and have to be brushed down.

In 1980 during a team roping event, a green horse accidentally injured Doug's knee. Unable to continue with the custom carpentry jobs, Doug was hired to run a pallet company.

With a need for standardization, Doug was involved in the pallet rental business and helped develop a software program to control the pallets. Eventually this company was sold and Doug moved to CPC Pallet. CPC was bought out by IFCO a European consortium and Doug was the Vice-president of Sales.

In 2000 Doug and Jackie moved to Vancouver area, Salmon Arm, for IFCO. In 2004 the Kinley's were relocated to the Maritimes where they explored Atlantic Canada. While living in Salmon Arm, Doug was given the opportunity to join Rotary. Seeking the advice of Gardy Shaw "The more you put into Rotary, the more you get out of it". With that advice Doug joined Rotary and he bought a boat.

Since then Doug and Jackie moved back to the Griffin Ranch. Doug maintained his Rotary membership and transferred to the Cochrane club and then to Calgary Heritage Park.

Harry Kim thanked Doug for an informative 'Classification Talk'.

About Polio-Plus

Despite tremendous progress in reducing the incidence of polio, it still exists. Polio will continue to threaten children everywhere as long as it exists somewhere. In this age of global travel, a new outbreak of polio might only be a plane ride away.

Did you know that . . . (1) Polio is a highly infectious disease that primarily affects children under the age of three and can cause paralysis within hours. (2) Before eradication efforts began in 1988, polio paralyzed more than 1,000 children a day, which totalled about 350,000 children annually. The incidence of polio has since declined by more than 99 percent. (3) Vaccinations easily can stave off polio. Vaccinations have prevented

an estimated 500,000 children per year from contracting polio. A child can be protected against polio for as little as 60 cents (US) worth of vaccine. (4) Only four countries are still polio endemic – an all-time low: Nigeria, India, Pakistan, and Afghanistan. (5) Rotary International is the spearheading member of the Global Polio Eradication Initiative and is the largest private sector donor. It has contributed more than US\$600 million to the polio eradication activities in 122 countries. In addition, tens of thousands of Rotarians have partnered with their national ministries of health, UNICEF, the World Health Organization, the U.S. Centers for Disease Control and Prevention, and with health providers at the grassroots level in thousands of communities.

A polio-free world is within our grasp. Join Rotary's effort to end this crippling disease. Learn more about Rotary's ongoing effort to eradicate polio and how you can help through contributions to PolioPlus and PolioPlus Partners.

The PolioPlus Division of The Rotary Foundation supports Rotarians' efforts to achieve Rotary International's and its Foundation's goal of the certification of the eradication of the wild poliovirus. This support includes the provision of quality education and information to promote the efforts of Rotarians directly involved in polio eradication activities, and the membership at large; facilitation of interaction, particularly between Rotarians in polio free and polio affected countries, collaboration with Rotary's partners in the Polio Eradication Initiative, and grants to Rotarians and partner organizations.
