

Adventures in the Environment 2022

TO HIGH SCHOOL PRINCIPAL, GUIDANCE HEAD, AND SCIENCE HEAD:

After a two-year hiatus because of COVID, the Rotary Club of Cornwall Sunrise will again be hosting Adventures in the Environment in September 2022.

This is a four-day adventure in environmental science hosted by the Rotary Club of Cornwall Sunrise at the St. Lawrence River Institute of Environmental Science at 6 Belmont St (next to and east of St Lawrence College).

This year we are limiting our numbers to participants from the Cornwall area high schools. Each participant **must** have completed Grade 10 science, be an avid environmental science student, be and committed to a 4-day program which will run from Monday Sept 12 to Thursday Sept 16, 2022, 9 am to 4 pm. The science leaders will be the scientists from the River Institute who bring not only their expertise but also their enthusiasm for their area of environmental studies.

Attached you will find a proposed program, an application form, and a permission form.

The program may be adjusted to accommodate for weather. Each participant should be prepared to go into the St Lawrence River or Rotary creek as the water component will involve getting samples from both areas. It is recommended that each participant bring a complete change of clothing as experience has shown that things happen on adventures!

Each student will be expected to be at the River Institute by 8:45 am every day of the Adventure, will bring their own brown-bag lunch (there will be no time allocated to go out for lunch because each lunch hour will have a guest speaker) and should be picked up by 4:00 pm.

The Rotary Club of Cornwall Sunrise is pleased to offer this program again – we are limited to 8 participants. We hope to have a representative from 8 different area high schools – registration will be on a first come, first served basis.

If you have questions – please contact Katie Burke at brkcornwall@gmail.com or at 613 933 8353
