

## APPENDIX A Using One (1) Device for both Zoom and Kahoot

Using one device (such as a laptop or desktop) can be simpler during game play but may be tricky to set up (don't fret! keep reading).

In short, you will need to:

- Join the Zoom event (in either the app or a web browser)
- Open [kahoot.it](https://kahoot.it) in a web browser (e.g. Chrome, Edge).
- Tile the 2 windows (see **Figure A1**)
  - "Tiling" windows means to resize the program windows
  - THIS step will potentially difficult/frustrating part. Give yourself a few minutes to get it right.
  - Here is a **YouTube video** demonstration:
