SIGNS SIGNS EVERYWHERE THERE'S SIGNS

Yesterday a friend gave me a plant and said that on the day it blooms, I'll meet my soulmate. Today it was eaten by my cat. I'm done.

The Sheriff decided to look at weather facts this week...

Did you know that the coldest time of the day is normally about half an hour after sunrise?

When the sun rises in the morning, we begin to receive solar radiation but **the solar radiation right at sunrise is very weak, often weaker than the radiation leaving the earth's surface.**

Prince Rupert, British Columbia. With 2,620 mm (103 in) of precipitation annually on average, 2,530 mm (100 in) of it rain, it is Canada's wettest city.

Wettest place on earth? Mawsynram, India with an average annual rainfall of **11,872 millimetres** (467.4 in). According to the Guinness Book of World Records, Mawsynram received 26,000 millimetres (1,000 in) of rainfall in 1985.

The members were putting money in the collection tray before the Sheriff was even finished. I think they consider it as early training for the upcoming tax season.

Rotary Theme 2024-25 -

Rotary Music Festival – The contract has apparently been vetted and mostly agreed too. The only is being discussed is the duration of the contract with three years being Rotary's preference.

Lights in a Bottle Sales – with the Capri Centre being unavailable due to roof repairs, we are seeking another site to hold our sales in.
