Rotary Foundation –

Words from a Past Rotary Foundation Global Grant Scholar

“During my time as a Rotary scholar, I learned to look at development differently. We often think of international aid in terms of poverty reduction, and we often see poverty reduction in terms of dollars spent and earned. The anthropology of development aims to analyze global aid in another way. We pay particular attention to how initiatives play out on the ground to determine just what local communities’ needs are and how those needs might be met sustainably and, eventually, autonomously....Rotarians understand that to have the most impact, we need to learn from other cultures. As global

grant scholars, that’s what we aim to do – during our studies, and afterward.”
Levi Vonk, Global Grant Scholar and Fulbright fellow to Mexico

Learn more about Levi’s story in [The Rotarian](https://www.rotary.org/en/rotary-global-scholar-helps-migrant-workers-shelters), <https://www.rotary.org/en/rotary-global-scholar-helps-migrant-workers-shelters>.

Meteorological Trivia

Wingtip vortices are circular patterns of rotating air left behind a wing as it generates lift. Note that the vortices are counter rotating

Von Karman Vortex Street Downwind from an island. Cause is a cloud layer is present at the altitude where the vortices are created, the streets become visible.

Ship tracks in fog over ocean. Cause is likely moisture addition from engines being stirred by ship motion. Particles of sulphur dioxide in the smoke plumes produced by cargo ships have been found to have a cooling effect.
