

Help us to make waves that will ripple out to benefit Guatemalan children, their families and communities!
Any contribution you make is appreciated.

Dear Ripple Effect Program Supporters,

We are writing to ask you to participate in the life changing achievements in Guatemala led by Rotarians in Guatemala and in Canada. Your contributions can make a huge difference. We have seen it happen over and over again:

- + **Classrooms are being built.** That means more children can attend school. Many classrooms are equipped with computers and provided with a sustainable teacher training program.
- + **Kitchens are being built at the schools.** That means the students receive nutritious nourishment daily.
- + **Washrooms are being built to replace substandard toilets.** That means girls are more likely to attend school given they will have the privacy to which they are entitled. In conjunction with the construction of new toilets and wash stations, students and teachers receive training in hygiene and menstruation.
- + **Scholarships are awarded to middle and high school students.** That means students who could not otherwise afford to continue their studies past elementary school can achieve an education that will lift them and their families out of poverty.
- + **Scholarships are awarded to teachers and students to attend university.** That means more qualified teachers are available.

The construction projects are a means to a positive end, the education of the young people, a better quality of life for them and their families, and an improvement in the communities in which they live – those are the accomplishments and continuing goals of the Ripple Effect Program.

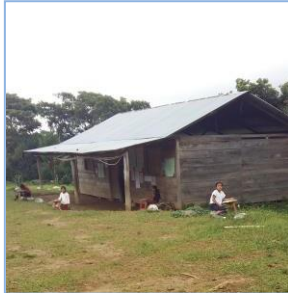

Building Schools – Growing Communities
