

# **Blue Jay**

## **Limited Edition Print**

### **By the late Donald Leo Malick**

Noted artist Don Malick's works are in several public galleries in different countries and who provided 23 plates for the National Geographic Bird Guide.

This Professionally framed wildlife print , created in 1983, is number 113/950.

"One of North America's handsomest birds, the jay adds a vibrant colour note to any season. But to me he always seems "bluer" in a setting of autumn gold. It is with this in mind that I have depicted him surrounded by yellowing aspens, giving his characteristic call."
