Presentation -Frank Rodgers was scheduled to get a speaker today and decided he would do the talking himself - about flying and skiing, his favorite things.

When he was 12 years old, he loved to watch the planes take off from his local airport. That same year he also started skiing.

During World War II he enlisted in the Air Force, hoping they would give him flying lessons, but he wound on an Air Base in Alabama, working on airplanes.

One day a test pilot let him come along for the ride during a test. After 2 years, he still had no flight training and the Air Force let him out.

During this time he had 3 boys and also met Joe Koch. His whole family loved skiing and they rented a house at Mad River. while in the Valley, he took a glider ride at the Sugarbush Airport.

They came to Vermont so much they decided to buy a house in the center of Waitsfield. Then his wife bought him a gift certificate to learn flying. He met fantastic people at our local airport and joined the Soar Club. On his 1st flight, he was lucky and rode a 3wave2 coming over the mountain for a long time.

His instructor is now heading up a project for NASA to fly to the moon again. FRank also met Bob Bucks, who has flown a B17 around the world.

He decided to buy a small plane and after a lot of advice from his friends, he located a plane in Wisconsin. It was not near salt water, which causes a lot of corrosion on planes.

The owner took the plane for a test flight. First the plane stalled on the runway, then after the second try, got off the runway but was smoking. The smoke turned out to be water in the gasoline and the plane was OK.

He says the hardest part of flying a soar plane is the landing. You fly low over the landing strip and let it drop gradually.

It takes him 6 hours to fly here from his home in N.J. but he can fly the distance in 1 1/2 hours.

He met Jim Parker who took him on a stunt ride, including snap rolls, hammer heads (diving straight down with a 6G force), flying upside down which included 4 snap rolls. He was strapped loosely in his seat during this flight. A video camera was focused on him during the flight. He shows this film only to people who have a strong stomach.

He say Joe Koch knows so much about many planes that Frank enjoys going to Air Shows with him. He often flies along the Jersey coast to Atlantic City. He also likes to fly over rivers, but not the East River as it is too narrow and many small planes and helicopters fly in this area. He also likes to follow roads.

Bob Holden, John Daniell are among the people he met and flew with at Sugarbush Airport. Frank got his pilot¹s license at age 60 and has many hours to his credit now.
