## Earth Day 2022

Today we heard from Kari Bauer from the Climate Reality Project highlighting the ever increasing global warming and the impact that is causing in virtually all areas of the world not only to the environment but the global economy and health. Emphasis on renewable energy and greener energy will some of the keys to slowing this trend or even reversing it in the future. These types of projects need to be starting now. Realizing this, Rotary International has added Protecting the Environment as one of their areas of focus.

The Rotary Foundation will enable our members and their community allies to take action in several ways. Indeed **18.4 million** in Foundation global grant funding has been allocated to environment-related causes in the past five years through our support of community economic development and water, sanitation, and hygiene projects.
