Meeting Recap for June 11, 2021

Thought of the Day was delivered by: **Walter Helm**. He shared his experience with WAVE, our charity partner for the Pacific Crest Trail Hike. Walter heard of 2 or 3 girls needing a safe place to stay for about 2 weeks. He volunteered to take the girls in for a while. Well, it took 6 months for WEAVE to find a suitable safe home for the girls to live. While the girls were with Walter, he took them too many places and gave the girls experiences they had not had so far in their lives. Walter is a Great person, doing wonderful things. Thanks Walter.

We heard from **Raquel Shipp**, Executive Director of the Sacramento Youth Center. They received a \$5,000 Grant from our Club for a mentoring program for youths in our Community. This has helped many kids to have a safe place to “hangout” with resources to use. They can do homework, read, use computers for projects and classes. They also have activities for kids to keep them off the streets.

Past President, **Carl Naake** needs volunteers for a Rise Against Hunger challenge. This is something District Governor Desiree has developed. The date is July 31, 2021 at 9:00 am. Carl needs 10 people to pack, 5 people to play a trivia game and 4 to play a corn hole game. Please contact Carl if you can help. 916-216-9929 or email: carlnaake@att.net

Meeting Recap Continues

Demotion Party will be on **Saturday, July 10, 2021** at Carol and Paul Cunha’s beautiful home. Paul needs help! Please contact him before he has to call you. 916-539-5809

During the meeting an auction was held to help raise funds for the Pacific Crest Trail Hike & WEAVE. The auction item was an opportunity to Fly with Walter Helm. Two flights were auctioned and Glen Cheron was the highest bidder for both at \$500 each. Thank you Glen.

Our Speaker was **Dr. Mark Lee**, Orthopaedic Trauma Surgeon, U.C.D. Medical Center. Dr. Lee spoke on the problems with bone healing after injuries and from cancer treatment. Many times the attempt to “fix” the bone either leaves gaps or the repair attempt does not heal as intended. They are doing research on using the patient’s bone marrow to harvest stem cells and using it to fill-in the gaps of the bone.
