VIII. Speaker – Tracy Kunce, Youth EKG Screening and AED Availability

Excellent presentation about the need to screen kids' hearts for unknown issues and the ability to save kids in cardiac arrest. EKGs for EGK is a local non-profit formed by life-long Bartlett residents after they lost their daughter and sister to a sudden cardiac event. The organization seeks to provide EKG screenings to area youth and to provide generally available AEDs in places where people gather. They asked us to partner with them in this project and place AEDs in Bartlett, maybe starting with Koehler Field. The cost would be between \$1,000 and \$4,000 depending on the AED needed. There are also monitoring and maintenance requirements. This initiative is particularly relevant to our Club after the events of this year.

IX. President's Report
