

Working Together, We Can Make A Difference In Providing Clean Water.

Five For Water via The Clean Water for Coffee Producing Countries Donor Advised Fund at The Rotary Foundation has successfully funded six projects worldwide.

IN TANZANIA

In cooperation with the Jane Goodall Institute, Five For Water constructed facilities to protect two sources of spring water from contamination from animals... allowing 800 people to enjoy clean water.

IN UGANDA

A well was constructed to provide clean water for 70 children at an orphanage. The well also provides water for the local village Atai and its 2,000 people.

IN KENYA

A new water well, pump tank and tower, located at the village of Miguta, provides clean water for the medical clinic and village.

IN BOLIVIA

Eight new water wells now serve eight different villages, benefiting 750 people.

IN HAITI

A new well serves an orphanage and school that educates 250 children in Thomassique.

IN HONDURAS

In cooperation with Engineers Without Borders, a water main pipe was installed to a nearby village to provide access to clean water from an existing large water tank. The clean water is now accessible to 300 homes.

To date, six countries have benefitted from the efforts to provide clean water to coffee producing countries, but the need doesn't stop there. 1.1 billion people still do not have access to clean water.
