Repurposing Sustainability Responsibility

MRN, continues to apply for funding for our major "X-Ray 4TB Health Project". We have expanded our network to include Daru, PNG and Outback Australia, and we welcome two new Australian Hospitals to our network. More below.

From Bathurst with Love

Thanks to the Rotary Club of Bathurst for their \$1000 donation, Port Moresby and Gerehu Hospitals have been given an upgrade to their MRN Portable Ultrasounds with foetal monitors, finger oximeters and a trans-vaginal probe to extend the Ultrasound use.

Australian Customs Exemption

MRN has been granted approval for Australian Customs Exemption on receipt of donated goods (Ultrasounds)

Patient Monitors to Australian Outback

A big thanks to the NSW Health hospitals – Prince of Wales, Randwick and Nepean Hospital, Penrith. They recently upgraded their diagnostic patient monitors and were happy to provide the old ones – still in good nick, to Katherine and Tennant Creek Hospitals as well as Purple House, Alice Springs.

Repurposed Equipment Marketing

To streamline the process from donation to delivery of medical equipment, MRN has introduced Equipment Repurposed Bulletins that provide detailed information on the items required to donor hospitals or the items donated and held in stock for recipients.

X-Ray project gains more support – Needs a \$5000-partner

This major project to buy a digital X-Ray system to monitor TB in Enga Province has received support from the Enga Health Authority, and our patron for this project, Mr Sakias Tameo, PNG *Chargé d'affaires a.i.* to Australia.

We are applying for Australian DFAT funding. We have financial support from Rotary Clubs of Sydney Cove and project support from the Rotary Clubs of Goroka and Port Moresby.

We need a Rotary Club or an additional sponsor or business to invest \$5,000 to partner with us in this project. Please connect if you can help.

MRN Website needs a review

Are you a webmaster? Would you be able to donate a few hours a week providing professional advice and a little labor to help refresh the MRN website? Please connect with us if you can. www.mnetwork.com.au
