Meet Thanh "Timmy" Pham

Introduction by Joel Paget

It is my pleasure to introduce you to the newest member of Rotary, Thanh "Timmy" Pham, classification Technology – Web Development. Timmy was sponsored by Bill Smead and Joel Ferrell, who we thank.

Anyone who has a website or has a physical product and would like to get an e-commerce space should be interested in the services that Timmy provides through his company Eagle Genuis. Timmy also is the engineer behind MetaCDN, a cloud based content delivery network startup company that offers video transcoding, streaming video, and web accelerator services.

Timmy is an immigration success story. He was born in Vietnam. He went to high school in Salt Lake, Utah and received his B.A. Magna Cum Lade from the University of Richmond majoring in math and business. He moved to Melbourne, Australia where he obtained a master's degree in informational technology and developed a startup called "Parkhound", the "Airbnb" for parking spaces.

He returned to the United States as a permanent resident when his parents' petition was approved for permanent residency based on the EB-5 investment.

He wanted to join Seattle Rotary #4 in order to be involved in the community and contribute through service to others. He enjoys hiking, yoga and golfing.

So why is the firm name "Eagle Genius"? Well, the eagle is the symbol of America and genius is for the "smarts" that it takes to do what Timmy is doing.
