Guest Speaker- Carlyle Johnston- Santa Barbara County Works Department

Carlyle Johnston of the Santa Barbara County Works Department gave a talk on “China, the Global economy and the environment... and its impact on recycling in Santa Barbara”. He explained the importance of new regulations on accepting recycled product in China and how that will impact residents in Santa Barbara, such as where our recycled products go and what is accepted in our recycle can. China has

imposed a ban on accepting new recycled product that doesn't meet its strict new environmental laws. This requires the US to either process all recycled components ourselves and find a use for them, or create better standards and eliminate plastic waste. One key point that Carlyle made was the importance of recycling aluminum- not only does recycling aluminum decrease the need for mined bauxite (which

has a HUGE carbon footprint) but that aluminum is recycled locally which means it is held to local environmental laws. His lecture stressed the importance of recycling and the importance of coming up with better more sustainable solutions for a brighter future.

Transition House Secret Santa Every year we do a Christmas event where we do a secret Santa for residents of a transition house where we shop and provide presents for residents to wrap. We typically provide for four families with young children. Gifts need to happen before Dec. 15th, please contact Scott Missman.
