Every Day Use of AI

In case you missed last week, we met offsite downtown at The Welcome Room, a new comedy venue under construction at Main and Oak Streets. Founder and director Alex Schneider has established the Welcome Room as a 501c3 charity and expects their grand opening in late spring 2027.

The venue has seating for over 270 in a historic early 20th century space that includes room for a speakeasy on the Oak side of the building. After so many years of no standup comedy in Ventura, this will be a great community asset we'll definitely want to revisit!

If you can join us today, Saurabh will share a demonstration of every-day use of AI.
