WHY DOES POLIO ERADICATION MATTER?

REDUCED BY

99%

Polio has been reduced by 99% and we are closer than ever to ending it.

No child anywhere in the world will have to suffer from this crippling disease.

Reaching all children with the polio vaccine leads the way to reaching them with other life-saving resources.

Until polio is stopped, children everywhere are at risk.

Achieving a polio-free world will prove what's possible when the global community comes together to improve children's lives.
