

Be sure to leave room for your official Little Free Library sign. It identifies this structure with the registry number, lets people know you are part of an international movement, and tells patrons what to do: Take a book. Return a book.

LFL signs will be sent once your library is registered.

The apex of the roof will stay dry if you cover it with a piece of sheet metal.

Keep in mind that rain and snow have a way of finding their way inside unless you have a substantial overhang here, tight seals in all joints, no holes in the roof and no holes that would let even a drop fall on the books. Double walls can make a big difference!
