

Helpful storage tips:

- ◆ Store your fruit in a cool, dry area. Keep the fruit between 40 - 50 degrees. An attached garage works very well.
- ◆ *Do not allow the fruit to freeze.* If there may be danger of freezing before you've enjoyed all the fruit, cover the carton(s) with a blanket or place in a chest-type beverage container or cooler.
- ◆ It is best NOT to refrigerate. The fruit will dry out more quickly. If you prefer to enjoy cold fruit, try refrigerating smaller quantities at a time.
- ◆ "Sort and Turn" all the fruit in the box each week. It will help keep it fresher.
- ◆ Make some juice. The fruit makes great juice so you can also enjoy it this way.
- ◆ When stored properly, many customers have enjoyed Rotary fruit well into February!

Thank you for your support!
