

## The AirPod

**The latest wellness technology is now available.**

Oxygen is critical for the health and repair of damaged cells, tissues and organs. Under normal conditions we inhale 21% oxygen from the air we breathe. Increasing the pressure inside the AirPod improves the oxygen availability by 7% in your Plasma. This combined oxygen, now in your blood circulation system is 28%, **a 35% increase.** This extra oxygen availability can now be delivered to reactivate, cells, organs and tissues.

- **Reduces oedema (swelling)**
- **Anti-aging**
- **Reduces fatigue**
- **Addresses stress symptoms**
- **Minimises soft tissue injuries**
- **Accelerates metabolism**
- **Skin rejuvenation**
- **Addresses Hypoxia**
- **Assists with Migraines**

The AirPod is a comfortable, relaxing and a meditative experience. Once the client is inside and the unit is sealed, it slowly pressurises over 5 minutes. The client must clear their ears until the AirPod reaches 1.35ATA. Once pressurised a steady flow of filtered clean compressed air is maintained during the therapy.

### ***Factsheet & Support***

- **1.35 atmospheres (ATA)**
- **5mm aluminium construction**
- **Dual controls (client and operator controls)**
- **Standard 10A power point**
- **Annual maintenance program**
- **Installation and specialised operator training**
- **Marketing support for commercial operators**
- **3 year warranty**
- **Height - 2m. Diameter - 80cm. Aluminium and Stainless Steel. Weight - 170kgs**

As with any instance of dissolving gas into a liquid, pressure is used to dissolve more oxygen into the blood plasma. The increased pressure in the AirPod forces this extra oxygen into brain cells, tissues and organs.

### ***Outcomes***

Dedicated facilities offering AirPod treatments are frequented by professional athletes, executives and everyday people.

We have included the AirPod in our ***“Effortless Wellness”*** program to keep you healthy.

The AirPod is comfortable, relaxing and a meditative experience. Once inside the AirPod it takes 5 minutes to reach maximum pressure. All you have to do is clear your ears until the AirPod reaches maximum pressure. Once pressurised a steady flow of clean filtered air is maintained during the therapy. There are internal and external control systems.

**For further information and demonstrations call Stuart Bain on +61 431 801 327 or come in and experience the AirPod at our premises at 359 Clarendon Street South Melbourne VIC 3205 Australia.**
