Making a difference

RCBN aims to make a real difference to the quality of life of members of our local community. RCBN has made significant financial contributions to research projects at the Murdoch Childrens Research Institute including research into childhood cancer and genetic condition Friedreichs Ataxia. We also extend our reach abroad to help underprivileged individuals and communities in our region.

These significant achievements would not be possible without the generous commitment and support of the RCBN members, family and friends. Your support enables us to continue to make a difference to the lives of those who need it most.

An event not to be missed!
