# ALZHEIMERS: THE CURE

**Rotary Club of Albert Park members are dedicated men and women who make the local and wider community a better place. Their goal is to simply improve the lives of others.**

**We are running towards finding better ways to diagnose, treat, and ultimately find a cure for Alzheimer's disease.**

## **Why Support Us**

Alzheimer's disease is the most common form of dementia. Dementia is a serious loss of mental capacity that can result in confusion and permanent

loss of memory. It is the third largest cause of death in Australia.

An estimated 300,000 Australians currently live with dementia. Without a significant medical breakthrough, that is expected to soar to almost one million by 2050.

We are raising funds for research at the Florey Institute of Neuroscience and Mental Health - looking for that medical breakthrough!
