WE NEED TO FILL IT FOR CAMBODIA..QUICKLY

The total protein source for a family of 5 for a whole day

The seeds planted and growing

12 months of clean water courtesy of Aquabox

Donations of watering cans

Bror Boain Village in the Kampong Speu province... "I found this village fascinating and quite confronting at once. The people obviously need our help quite urgently. I enjoyed donating as I felt they were greatly appreciative of our donations."

The 180 people in this village live in the most primitive of conditions – no safe water, & water permeable thatched "lean tos" for their homes. There have been 7 deaths of people under 24 years of age since October 2011 from cholera and malaria.

The January EWO tour group found it wonderful to see the difference in the villagers' general health and nutrition since emergency food aid  was provided for the past 6 months. They are looking much better and have more energy to work.

The opportunities presented to the village ie seed and Aquabox have been fully utilized. The village elder ensures that the community work hard. We donated seed during the January tour and returned 3 days later to find 3 plots already planted. 4 villagers have been assisted to Phnom Penh to receive emergency medical attention. The community are exceedingly thankful for our help, and we were overcome by the hugs and thanks from the villagers.

Since the tour Rotary has provided an assessment of the water needs for both drinking and irrigation. So now we need to assist with some infrastructure to allow planting, cultivation and reaping of crops. Also, we need to assist the children attend school. They need to travel around 20kms by foot in over 30 degree heat...and with empty stomachs.

Fortuitously we have been offered a shipping container along with free freight. There are several projects that have asked for supplies which we would love to provide. A short time frame means that we need these by the end of February.

Can you help by donating:

- ◇ Generators; battery/solar powered
- ◇ Bicycles suitable for bumpy dirt tracks
- ◇ Old laptops 
- ◇ Office chairs
- ◇ Desks
- ◇ Garden tools
- ◇ Wheelbarrows
- ◇ Sewing machines
- Manual (not electric) 
- ◇ Clothing
- ◇ Blankets
- ◇ School supplies (exercise books, pens, pencils etc)
