

HELP SAVE THESE POVERTY STRICKEN PEOPLE YOUR GENEROSITY WILL SUPPORT THE SUPPLY OF AN EMERGENCY VEHICLE

Run-away Fires , fanned by gale force winds, place people, property and the environment at severe risk.

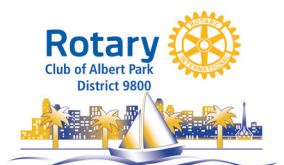

People's lives are under constant threat and many lose all of their meagre possessions and are badly burned (especially children). The resources of the permanent services are often stretched beyond capacity and volunteers struggle to control these fires as there are not sufficient working fire engines and emergency vehicles to service the area.

Photo of a vehicle similar to the one planned to support local needs

The Key Objective is to build the emergency response and disaster management capability needed. Primary purpose is to deploy personnel, medical and fire delivery for fire & disaster situations and provide rescue support. Use of this vehicle will allow access to previously inaccessible areas.
