## **INTRODUCTION**

### **a. Background**

Health is the most important part of human life. Both physically and spiritually. Not exception of early childhood, every parent wants his son to grow and grow optimally, this can be achieved if their body is healthy.

Health to note other than general health body, also dental and mouth health, because of health and teeth health can affect the body's health thoroughly. In other words that dental and mouth health is an integral part of overall body health that can not be separated from the general body in general.

Dental and mouth health is very important because derfect and unpacked teeth and gums will cause pain, dying disorders and can interfere with other healthy health.

The number of caries, gingivitis and teeth tend to be addressed and all can be prevented. Maintaining teeth and mouth health is very important to obtain our body health.

Especially in children, because in childhood is very important because the conditions of dental dentism (dental decidui) is now determining the state of the permanent dentist of his successor. To achieve optimal dental and mouth health, it should be done periodically. Treatments can start from paying attention to food diet, and do not too much foods that contain sugar and sticky foods. Cleaning the plaque and remaining food remaining with brushing teeth, techniques and how should not damage the structure of the tooth and gums.

Cleansing of the tooth and dental fishing by the dentist, as well as the revocation of the tooth that can not be maintained again and is an infectious focal. Czech visit to the dentist every six months of the balk there is a complaint or no complaints.

By paying attention to these things, it will be achieved an optimal dental and mouth health. Thus will improve overall body health and will increase better work ethics. So physical and spiritual health as expected to be achieved.
