

T-G-I-F-I-Y

PUBLISHED WEEKLY BY THE ROTARY CLUB OF YARMOUTH

Vol.26 No. 3

July 15,2016

The Main Event

NEW MEMBER: ROBY WHITEHOUSE

Membership Co-Chair and Past President, **Tom Tomasik**, oversaw the process of bringing **Roby Whitehouse** into membership of the Rotary Club of Yarmouth. Her sponsor is **Kevin Lennon**, and her classification is DPW Administrative Supervisor (for the Town of Yarmouth). **Roby**, in emphasizing her dedication to family and community, noted that “Rotary seems the best way of giving back.” (*Congratulations and welcome!*)

GUEST SPEAKER: DR. PHIL DUFFY, WOODS HOLE RESEARCH CENTER (WHRC)

The Woods Hole Research Center, headquartered in Falmouth, MA, is an independent research institute where scientists investigate the causes and effects of climate change in order to identify and implement opportunities for conservation, restoration, and economic development around the world. For three years running, the WHRC has been acclaimed as the *world's #1-ranked independent climate change think tank* by the International Center for Climate Governance. In October 2014, the Woods Hole Research Center named **Dr. Philip B. Duffy** as its President and Executive Director.

The bringing together of this internationally respected institution and an equally renown leader in climate science and public policy has been noteworthy at many levels - from locally with Cape Cod interests to policy making and population concerns around the world. **Dr. Duffy's** expertise has been in the areas of domestic climate policy, international climate change negotiations, climate change adaptation, extreme weather risk, and climate modeling.

He has a PhD in Applied Physics from Stanford (1986) and an AB in Astronomy and Astrophysics (*magna cum laude*) from Harvard University (1979). He has devoted his career to the use of science in addressing climate change. Prior to joining WHRC, **Dr. Phil Duffy** served in the White House National Science and Technology Council as the Senior Advisor to the US Global Change Research Program, and as a Senior Policy Analyst in the White House Office of Science and Technology Policy. In these roles, he was involved in international climate negotiations, in domestic and international climate policy, and in coordination of US global change research.

In his presentation, **Dr. Duffy** outlined • the various roles of the WHRC as an observer organization, • the background and impact of the Paris Climate Agreement (195 countries), • the leadership responsibilities of the U. S. and China, • projections and politics of decreasing greenhouse omissions (particularly CO₂), and • the interplay between developing countries and rich countries around the differences within their respective economic growth aspirations.

Contact information - Woods Hole Research Center, • 149 Woods Hole Road, Falmouth, MA 0250-1644, • (508) 444-1504 • <www.whrc.org>, **Philip B. Duffy**, President and Executive Director, • <pduffy@whrc.org>.

ANNOUNCEMENTS & UPDATES

President Melissa Farrell launched her inaugural command of assemblage management with appreciative credit to **President-Elect Matt Fitzsimmons** for his supervision of last week's meeting while she was away on a family trip.

• **President Melissa** reminder: the official visit of **District Governor Russell Bertrand** to the Yarmouth Rotary will be Thursday, July 28, with the Board of Directors and Friday, July 29, at the regular Club meeting.

• Yarmouth Rotary Club membership roster books are now available. Check your copy for committees, assignments, and key information.
