PUBLISHED WEEKLY BY THE ROTARY CLUB OF YARMOUTH

Vol. 21 No. 43

June 13th, 2014

## The Main Event

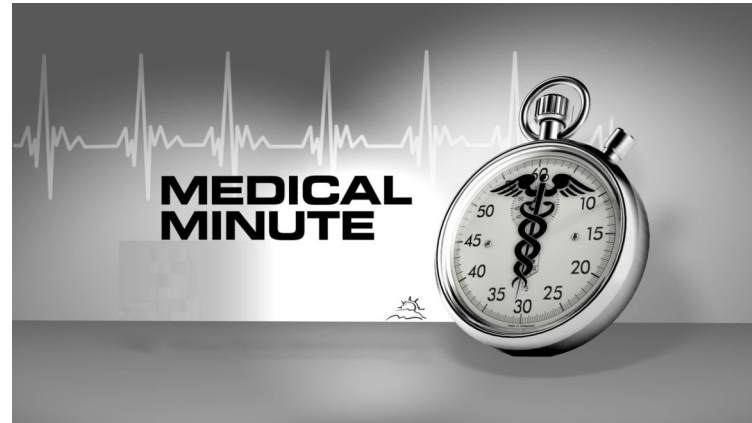

### SPECIAL PROGRAM –

**Bill Lemoine**, Chair of the Scholarship Committee, noted that while D-Y students who receive scholarships from the Yarmouth Rotary have a

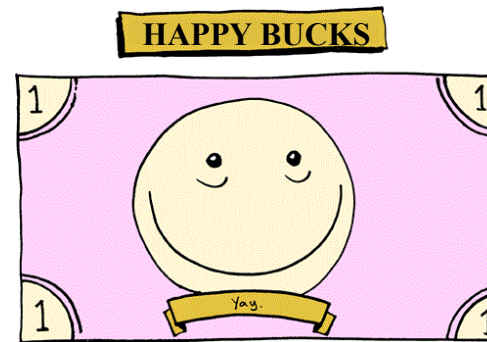

very public awards ceremony in which families and scholarship donors can be present, such is not the case with the student scholarship winners at Cape Cod Tech. There, it is a more private event complete with awards being presented at a dinner at the school.

Therefore, **Bill** and the Scholarship Committee used the occasion of the Club's Friday morning meeting to introduce the student award winners from CC Tech and present their scholarships or tool ships directly. This year's winners are **Sean Arone**, a \$500 Tool ship; and **Cassandra Johnson**, a \$1000 Scholarship.

### MEDICAL MINUTE FROM DR. BRUCE GORDON

**Dr. Bruce Gordon's** Medical Minute concerned the national crisis of the threat to the lives and hives of honeybees. While the source of bee die-off appears to be combination of factors coming together at the wrong time, a primary culprit is most likely the new predominate class of insecticides, called neonicotinoids, which accumulate in plants as persistent agents, which in turn negatively affect the navigational, and immune systems of pollinating honeybees. This chain-of-events renders the bees back in the hives more susceptible to parasites and harmful bacteria. Neonicotinoids are a class of neuro-active insecticides chemically similar to nicotine. The neonicotinoid family includes acetamiprid, clothanidin, imidacloprid, nitepyram, nithiazine, thiacloprid, and thiamethoxam.
