**ANNOUNCEMENTS:** **Bill Moniger** let us know that there are still Eagles tickets to the game on February 9th. Everyone is invited to this Fellowship event and if you are interested you can purchase tickets from Pat Williams. Also, please see **Irv Johnson** with any questions about using the directional mics.

**THUMBNAIL:** Diane Lapierre is a native Lovelander who recently moved back to Loveland and is now the city library director. She and her family enjoy living here and she is also a part of a flamenco dancing group who also performs. Diane is excited about joining rotary and really likes the service above self motto.

**PAUL HARRIS AWARD:** **Carol Stark-Sorg and Julie Johnson-Haffner** presented a Paul Harris Award to **Suzanne Peterson**—congratulations and thank you!

**PROGRAM:** **Betsy Burns** introduced Dr. Christopher Heckman who is an assistant professor in the Department of Computer Science at UC Boulder. His research focuses on autonomy, perception, field robotics, machine learning and artificial intelligence. Dr. Heckman's robotics work is used by both the government and commercial industry for the development of autonomous vehicles, agricultural platforms, and other mobile robots. Right now robots have a disconnect between sensory/tactile ability and reality – inference is not natural for computer programs. In Dr. Heckman's lab he and his students are working on self driving cars. They are also participating in a subterranean challenge sponsored by DARPA that focuses on underground exploration, search and rescue. Dr. Heckman's research has broader implications for many autonomous technologies that are being used and developed.
