Chartered in 1920 as Club 685
ANNOUNCEMENTS
Gary Camp (The Enforcer says...):
Gary announced it is high time we again start wearing our Rotary pins to meetings. Otherwise, you may expect to pay up!

Co-Pres Nicole Whitenight (Mask Mandate):
Nicole reminded us of Larimer County’s newest mask mandate for indoor public places - as of Oct 20 and until risk metrics come down for 21 consecutive days. So, for a little while to come, please wear a mask again at club meetings, except when eating. Thank you!

PROGRAM
Our program for Oct 19 was slated to be the TED talk “How to Live to be 100+” by National Geographic writer-explorer Dan Buettner, to be followed by table discussions about the video. This was the introduction to the talk by Co-Pres. Nicole:

In recent years, researchers have become increasingly interested in aging - why some people live much longer than others, and how to extend the period of healthy old age. Funded by U.S. National Institute on Aging and National Geographic, Dan Buettner set out to find places that had high concentrations of really old people, who were also characterized by robust health into very old age.

Now, due to technical difficulties, the video could not be shown, although there were table discussions on lessons about aging and longevity. All are encouraged to view this presentation at their leisure, at this link:
