## LAST WEEK'S PROGRAM

Dr. Bob Tello, who's cared for hundreds of seniors suffering from Dementia, gave us a great talk on the topic. Highlights included these: • Dementia is one of 2 memory loss conditions, the other one being Cognitive Deficit Disorder. • As we age, our concentration of *neurotransmitters* (and *receptors*) in our brains diminishes, causing memory issues. • Three common drugs (Aricept, Excelon, & Razadyne) act to inhibit an enzyme which destroys neurotransmitters. • Cognitive Deficit affects our ability to understand things (our cognition). • Dementia impairs not only memory but our behavior.
