THE FOUR-WAY TEST
- Is it the TRUTH?
- Is it FAIR to all concerned?
- Will it build GOOD WILL and BETTER FRIENDSHIPS?
- Will it be BENEFICIAL to all concerned?
- Is it fun?

ANNOUNCEMENTS: Gil Garcia and the Marine Corps League is hosting a service honoring 9/11 at 7pm at the Foote Lagoon. Charlie Bouchard on September 22nd, Diane Lapierre will host a welcome party for our new exchange student Martha. Diane Lapierre announced the Loveland Loves to Read Program-called Water in the West—on September 24th at 7pm. Jim Epstein announced that the tutoring program is now at seven schools and needs people to volunteer. Dixie Schmatz please RSVP for the FUNraiser on October 1st; and the city and the LHA want to honor Sam Betters with a sculpture if anyone would like to provide support. Cindy Guldy announced that there are some great donations already made for our FUNraiser and if anyone else wants to donate something let her know. Jerry Westbrook shared the 20 Rotarians who won prizes from the Duck Race. Carol Stark-Sorg from the Foundation Committee told us the different ways that the money is spent and she also presented Lynn Matson with his Paul Harris +5. Unfortunately, Lynn is transferring his membership to Fort Collins but he promised to come back and visit. Jon Kindschy read the notes from the last board meeting.

THUMBNAIL:
Art Sward moved to Colorado in 1983, with his wife and 4 children. He also has 8 grandchildren in the area. In 1978-79, while living in LA, they sponsored an immigrant family from Vietnam. It was the Swards’ responsibility to help them find housing, jobs and get settled in the community. In Loveland he also volunteers with many groups. PROGRAM: Gary Camp introduced Colonel Joe Bowden who has been in the USAF as a B52 pilot and weapons engineer. Col. Bowden was also a scientist at Northrop Grummon and US Strategic Command. Colonel Bowden talked about Chernobyl, which was the world’s worst nuclear accident. In April 1986, Chernobyl was caused by a failed safety test. This test supposed to be done before the reactor went online and after 4 years of running the reactor, the Russians decided that they would run the test. Most of the initial deaths were fireman and the evacuation didn’t start until 36 hours after the reaction (from 1986-2000 over 350,000 people evacuated). Official UN Source confirmed 49 deaths but no accurate account of how many people died or died from the effects of Chernobyl. The reactor is now under a containment building.
