## Summary

- Vast majority of new Covid cases are the Delta variant
- Delta is much more contagious and reproduces much more rapidly
- Variants form only in infected persons (defined by a positive PCR test)
- As the Delta virus has spread, the vaccine protection against infection has decreased from 90-95% to 60-80%
- The vaccines give 90-95% protection against Covid severe symptoms, hospitalization, and Covid death. This appears to be a stable protection for now
- The vast majority of Covid hospitalizations and infections are in the unvaccinated

## PROGRAM

"Matthew's House for At-Risk Youth" by Nicole Armstrong, Executive Director.

In 2003, Jerri Schmitz met a young man in Old Town Fort Collins. He had just aged out of foster care, which resulted in him couch-surfing and living on the streets. Jerri told him she was going to do some research and find resources for him. It turns out, back in the early 2000's, there weren't any resources for kids aging out of foster care in Larimer County. "Well, someone should do something about that," Jerri recalls thinking. That thought sparked the flame that eventually became The Matthews House.
