

Dave's Dystonia Walk

14th October 2018

Dystonia - The Disorder that you just can't shake off

This October, Dave is going to compete in the Melbourne Half Marathon

21.1kms to raise awareness for sufferers of Dystonia.

Dystonia is a neurological disorder which affects people in different ways, similar to that of Parkinson's Disease.

Having being diagnosed in March 2015 and undergoing Deep Brain Stimulation surgery in April 2017, Dave is now embarking on walking 21.1kms in this year's event to help raise funds for the **Brain Foundation** for research into Dystonia.

What can you do?

We are thinking \$21 for 21kms to get Dave over the line. We can't wait to share his journey with you.

- Start a conversation about Dystonia – research it!
- Share our post on Facebook.
- **Donation amount of your choice to Brain Foundation**
- To donate go to Dave's Dystonia Walk Facebook page or you can go to everydayhero:

<https://melbournemarathon2018.everydayhero.com/au/dave-s-dystonia-walk>

Thank you for the ongoing support!!!

All funds raised will support **Dave's walk to raise awareness for Dystonia** which will be donated to the **Brain Foundation** – to assist with research on Dystonia.

We are grateful for all donations and we thank you for your help in raising the awareness of Dystonia.

Proud supporters of Dave in this event are:
