# TWILIGHT GLOBAL GRANT PROJECT

---

## HYDROPONIC SYSTEMS IN CIUDAD SANDINO, NICARAGUA

Submitted by Pamela Elisheva, International Service

As you know, our Twilight Club is participating in Rotary Club of Santa Barbara Sunrise's (RCSBS's) Global Grant Project with Rotary Club Ciudad Sandino to provide aquaponics systems to 57 families in Ciudad Sandino, Nicaragua. Each family's system can be done for approximately \$700, and our Club has pledged \$1400 for two systems.

Santa Barbara Sunrise informs us that the Global Grant application is just about completed; they just finished a financial calculation as an attachment to the application. Our \$1400 is a pledge only at this time, and we will not send the \$1400 from our Rotary Club Twilight Foundation until the grant has been approved by The Rotary Foundation (TRF) and the agreement documentation signed by the two lead clubs.

TRF will request that the clubs who committed funds towards the grant send the money to them for the specific Global Grant number. Once TRF has received all the money, then they will distribute it to the special checking account for the grant project. This way, our club will also receive Paul Harris Fellow credit for the contribution. (YAY!)

Translation on the tank: "Donated by Rotary"
