

Share your career experience with Stillwater Area students!

In the fall of 2020, the Career Pathways program will be introduced at Stillwater Area High School. Through this program, students will be able to pursue coursework that aligns with the career paths they show interest in.

The Pathways program will also allow business leaders in our community the opportunity to expand learning beyond the classroom. Dozens have already offered up their time and talent to serve as mentors and create opportunities for job shadowing, internships and other career exploration experiences. The opportunities would give students real-life experience and provide the relevance our students desire.

YOU CAN HELP!

In January of 2020, 8th grade students at Oak-Land Middle School will have the chance to hear from dozens of guest speakers over the course of two days. Students will attend a variety of presentations, delivered by people who work within our community. Each presentation will introduce students to a different career, and help students better understand what must be done to secure a position in that field. We will need more than 20 guest speakers from a variety of fields, including: medical & healthcare, finance & business, engineering & the sciences, sales & customer service, accounting & legal, public & civil service, construction & the trades, info-technology & the arts.

If you're ready to share your time, talent and experience with students who call this area home, PLEASE consider volunteering as a guest speaker.

WHO: You! Help kids better understand what YOU do for a living

WHY: To help them determine the career paths they may explore in high school

WHEN: January 22nd & 23rd, 2020 WHERE: Oak-Land Middle School

WHAT: Donate a half or full day of your time; discuss your work with local 8th graders in a classroom setting

For More Information: www.stillwaterschools.org/pathways

Sponsors: The Stillwater Area Community Foundation (SACF)
