

Scholar Corner

Last week, Rotarian and GenMet CEO, Eric Isbister hosted RCM Scholar, Yahir Gonzalez, at GenMet, a custom metal fabricator located in Mequon. Eric, a longtime volunteer with our Scholarship Committee and mentor, knows the value that real-world experiences add to higher education.

This spring Eric invited RCM Scholars who are studying engineering to tour GenMet and apply for summer internships. Yahir, a freshman Mechanical Engineering Major at MSOE jumped at the opportunity. Yahir along with his Rotary Mentor, Saj Thachenkary, toured the GenMet facility on Wednesday. In addition, Eric took the time to talk with Yahir about company culture, expectations, and the qualities he looks for in interns and employees. Many thanks to Eric and Saj for their commitment to the Scholarship Program. And best of luck to Yahir!

Would your company or organization be interested in hosting an RCM Scholar for a tour, conversation, or work experience? RCM Scholars are always looking for shadowing, work, or intern experiences. Contact Melissa Marschka at melissam@milwaukee Rotary.com if you have an opportunity for a Scholar.

Thank you for all the ways that you support the RCM Scholars.
