

Nixon, 10 years old, has been having seizures up to 8 times a day. He was told by a doctor that he needed medicine, but they couldn't afford it. We paid for 3-months worth of an anti-convulsant to see if it works for him. Cost - \$126.

Don Carlos is deaf and mute and for a long time has suffered from a large scrotal hernia that has been causing him much pain.

Dona Florinda came with her brother to Obras for an evaluation. She had an umbilical hernia and bilateral hernias also. She has limited mental capabilities and didn't really understand what all was going on. She only speaks a little.

One of the Hermanos who runs the hospital said these two had come for surgeries but didn't have enough money. He told Flory the hospital would sponsor some of their costs if we could help out also. The people from their village had donated funds to help them get to the hospital. We paid the surgical fees - \$210 each.

DON CARLOS, FLORY, AND DONA FLORINDA AT OBRAS

I mentioned **Claudia** in a previous Photo Story, as someone waiting for surgery for a badly healed broken arm. She's only 41 years old.

She had the surgery in February and is in line here to get the stitches out.

I am happy to report the surgery was successful and she has the use of her arm again. She is so, so grateful for our support.

Costs: X-rays, labs, scans - \$215
Surgical fee - \$325
