

July 19, 2017

Guest: Jim Lookabaugh

Marshall has been in the hospital. (Followup- He is home after a short stay in the hospital. During a routine visit to the clinic it was discovered that he had low oxygen levels in the blood. He will be taking medication and using an oxygen tank for the next few weeks. He seems happy to have company.)

Vaughn announced that [Rotary International president-elect Sam Owori died.](#)

Dixie's Birthday is tomorrow! Birthday cake for Dixie will be at this evening's Wednesday Night Live.

Our exchange student, Jusa, left on Tuesday. Her flight was cancelled in Chicago but we think she is on her way home.

Please get your 10K Raffle tickets sold. Tickets will be released on Friday so if you haven't contacted your buyers do so soon.

Rotary night at the Mallards Duck Blind is July 30th \$15 ticket and hat.

Start gathering things for Silent Auction

Vaughn received his first Paul Harris Recognition Award!

Guest speaker: Jim Lookabaugh told us about a new company that he has formed called Vatezza. "Data is shared through the cloud millions of times each day. Now use the cloud to safeguard that data." Jim has a physics degree from U.W. and taught mechanical engineering at North Western. He started his new company to allow selective disclosure control. He said that there is info about us and our behavior that is spread across the internet. There is no governance – it's all or nothing without options. He wants to empower consumers and agencies to improve their data sharing. Vatezza is about ease of use and empowerment. Brent Yauchler and Tony Fry are partners. Beta testing will be in the 3rd quarter next year.
