Todd Lorenz from Olsson Associates spoke to the club on Friday. Olsson Associates offers comprehensive engineering and design solutions for public and private infrastructure projects. They specialize in projects that involve many disciplines such as environmental resources and compliance, water resources, transportation, building systems and landscape architecture and urban planning. They are consulting engineers who give technical advice as well as put together the plans for the contractors to build. They were founded in Lincoln in 1956 and now have locations all over the Midwest and Arizona. They have approximately 674 employees with more than 200 located in Lincoln. Some of their local projects include Antelope Valley, West Haymarket, the new LPS headquarters and attached retail, Fallbrook and South Pointe Pavilions.

find out what was most important to them and the response was natural light and noise control. As a result the building was configured to give the most window space possible. They also designed roof patios and a courtyard on the first level.

They will not be part of the historic district but right next to it so their goal was not to emulate the architecture but to blend in with it. Canopy street is the dividing line with the Historic Haymarket on the East side of the street and the new structures on the West side. They feel the new headquarters will help with employee recruiting and retention as it will be close to downtown living opportunities, restaurants, hotels and entertainment. Also there will be 5 new parking garages in the Haymarket so parking should not be a problem.

Todd spoke to us about "Project Oscar" which is the new corporate headquarters that Olsson Associates is constructing west of Historic Haymarket just 2 blocks south of the new arena. The structure will be 4 stories with retail on the 1st floor (possibly restaurants or a bank), Olsson offices on the 2nd and 3rd floors and yet to be determined tenants on the 4th floor. Before starting the design process for the building the company surveyed employees to

Todd stressed that the city has been great to work with during the process. They plan to break ground on May 1st and to be moved into the new facility by August 2014.
