

## Your Scholar's Correspondence

1st Semester 2022

**Name: Veng Sokong**

**Major: Public Administration**

**Year I: Semester One**

Dear Allentown Rotary Club Foundation,

Greetings to you from **Ratha**, SC Scholarship Coordinator. Please enjoy reading your scholars' correspondence.

*Here are the names of all the courses I studied in my 1<sup>st</sup> Semester:*

**Sokong:** Subjects I learnt in semester one are Introduction of public administration, Khmer history, political science, English computer, introduction to sociality

*Would you like to know about **my favorite subject** this semester and something important in this subject for my future plans?*

**Sokong:** My favorite subject in this semester is Khmer history science. Because I will be a person who has a good management and a Khmer history expert in this management

*Now that I am a university student, these are special skills and abilities that I am **discovering** that I have:*

**Sokong:** I am discovering that special skill and ability I have in this semester is read more books to get good experiences of study. Become a strong woman has to have good education. In addition, reading is help me to learn about the environment around me.

*I would like to describe **one specific experience** to help you know more about my life now in University.*

**Sokong:** One Specific experience of my university life is set the time properly. Study in the city is kind of hard of managing time. It's because of the traffic jam everywhere that makes workers, students struggling in arrive school on time or get to the office early. So my experience is I have to get up early, cook food for breakfast and lunch (I don't come back home till evening) and get ready for school. I normally go to school quite early 1 hour before class start. So I don't stress with the traffic.

*I would like to tell you about an **unexpected happy experience** that I had in my 1<sup>st</sup> semester.*

**Sokong:** An unexpected happy experience I had in first semester was getting to know experienced professors who teach for more than ten years, they encourage me and everyone in the class to study hard and us aware the environment in the city. I was so surprise. Also, my classmates are from different provinces and we had our provincial slang that we sometimes get confused when we explain the lesson to each other. The lesson and assignments are difficult but I felt good to discuss and do it with my classmates.

*Here is **one main challenge** that I met in this semester and how I am solving it:*

**Sokong:** The challenge I met in this semester is go to school. I go to school by bike. It takes about 40 mins to get to school. Traffic in Phnom Penh is not the same as in Pursat, there are traffic light everywhere and I have to be punctual so the solution is I ride my bike early in the morning and I pack some food and eat at school get to school on time.

When I was free from university, I went to do more research and I always read book, I do the laundry, prepare my room. My room where I rent was small so I need to make it tidy to get some spare place to sit to read some books.

***My special thanks to you, my sponsor.***

***Thank you for supporting me, I will study hard. I wish you with the best of time with family.***

***My name Veng Sokong***
