Student Internship Reflections

- **EBMUD Intern:** I am so grateful for this opportunity. I have learned so much in a very short amount of time, and I can't wait to see how I will use it in the future.
- **OSIsoft Intern:** The week was full of preparing for presentations: one for the company and the one on Thursday. I learned so much at OSIsoft.
- **Reflexicon Intern:** This was an unforgettable experience that exposed me to the medical device industry and have me work alongside engineers. Coming from the HABIT pathway, I first thought that this will be difficult, however I was introduced to a new workplace with welcoming people who explained and exposed me to the engineering environment.
- **Sutter Health Intern:** I was able to talk to some patients in Cantonese as well as listen to the live translator talk to patients. I made some lifelong connections with the nurses and my manager. Sometime in the near future, I plan to go back to the ED and continue learning.
