Back Cover Story Headline

Use paragraphs often. A wall of white text makes it hard for the reader to skim a story and find a way to quickly drop in and out of your content. White space gives the user an opening into your information. Don't be afraid to leave spaces open.

You might also designate a consistent spot on the page for lighter, or more editorial content. That way the reader always knows where to look for a certain type of content.

Most successful publications include a mix of content types to satisfy a wide range of tastes. Consider putting your most serious content on the front page, and your lighter content inside.

It's called a story for a reason

Integrate frequent headlines to announce different sections of your story. Consider writing your content in a personal tone, in the same way you might talk to someone sitting across from you at a restaurant.
