

Children's Museum for Science & Technology

Grand Opening Report

By: Rameen Javid

August 29, 2017

Thanks to a \$7,000.00 seed grant provided by a district 5450 grant, sponsored by University Hill Rotary Club in Denver Colorado, Afghanistan has opened its first Children's Museum for Science & Technology in August 19, 2017 in Taimani District of the capital, Kabul. Rotarian Rameen Javid of University Hill Rotary Club, who is also the founder of the museum, traveled to Kabul in August 2017 to inaugurate the museum. This district grant was co-sponsored by Rotary Club of Kabul City (RCKC) with a contribution of \$500. RCKC's bank account is: Afghan United Bank, 001202USD0923738, swift code AFGUAFKAXXX (intermediately bank, Standard Chartered Bank, NY acc#: ES7802198601090096601205 Banque Marocaine Du Commerce Exterieur International, S.A. 28006 Madrid Spain Swift BMCEESMMXXX).

District grant was approved on August 13, 2017. The Rotary Club of Kabul City held a fundraiser to help raise \$500 of its obligation on August 15, two days before grand opening on August 17, 2017. RCKC is waiting to send the money to where ever necessary. Mr. Hamid Stanikzai is the 2017-2018 President with an email address of stanikzai.keu@gmail.com.

ABOUT THE MUSEUM

After visiting a small children's museum Southern California, Rameen Javid thought such a museum can be built in Afghanistan with very little funds. The purpose of the museum is to show in practice & hands on experience, the lessons that are learned in school by children. Children's Museum for Science & Technology focuses on 6 areas of science including: physics, chemistry, biology, geology, astronomy & mechanics/electronics. Science classes start from 7th grade in Afghanistan, with physics, chemistry & biology courses as independent classes. In grades 10th & 11th students are taught geology. Astronomy is not part of the school curriculum independently, but are thought in physics classes to some degree. Mechanics are taught in vocational schools & universities.

The museum is housed in a 3 story 11 room 4 bathroom basement in Taimani Project of Kabul. There are two separate companies housed. One is Soft Power Solutions (SPS) belonging to Nadima Sahar, Rameen Javi'd wife, which is a research company. They are the official tenants of this building. The other company is called LEAD, a woman chamber of commerce that was recently given official status by the government & will be moving out at the end of September 2017. The basement consists of a large room plus two adjacent rooms with an area of 1205 square foot space. The larger room is 900 square foot, while the astronomy room is 180 square foot & biology room is 125 square foot. The three story -building has 11 rooms, including a roof & backyard.

LEGAL STATUS

The museum is legally backed by a woman owned local NGO called ESOFA (Education & Services Organization For Afghans) which is registered with the Ministry of Economy & a three campus teacher training institute called Daneshwaraan-e Afghan (translates as Afghan Knowledge Seekers), which is registered with the Ministry of Education. A bank account has not been set up, but can be in 48 hours with a local bank.

Due to limited funds, the museum will be completed in three steps; however, the stages will be completed when funding is available & does not solely rely on this timeline alone. The doors would be kept open at this stage with skeleton staff & minimal rent. Currently, the rooms are donated by Soft Power Solutions (SPS), Rameen Javid's wife.

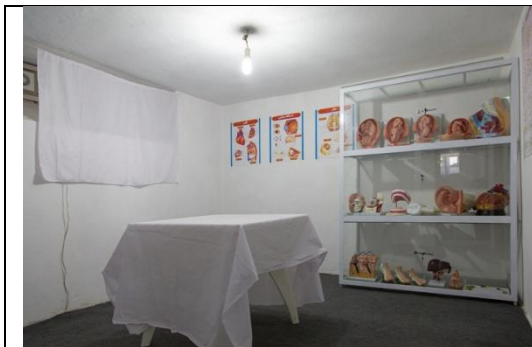

TEACHING METHODS

Due to a shortage of funding, the museum offers two kinds of field trips for schools only – for the moment. The general public are not encouraged to come largely because the museum does not have the staff and confidence to deal with the general public as of now. This will change in the future. The two kinds of field trips are:

1. Science Specific – schools choose a specific area of science or experiment (how lasers work, black holes, etc) and the museum will set up the experiments and bring the children for that particular experiment.
2. General – schools come to see what we have already without any special focus on any field.

We have two kinds of exhibitions

1. Behind the Glass – much like a museum, students get to see some of the exhibits from behind the glass and learn of their properties.
2. Hands on – with the guidance and supervision of the museum staff the students get to experiment with one of the six fields of science (physics, chemistry, biology, geology, astronomy & mechanics). The museum has at least one experiment per field that is hands on.

Behind the glass

Hands on

Our philosophy in teaching is that we do not want to replace the teachers, but to compliment the school curriculum with hands on fun science.

SHORT & LONG TERM PLANS

Step I – 2017 (short term)

- Do research
- Secure seed grant, perhaps \$5000 - \$10,000
- Purchase basic equipment
- Hire basic staff
- Built in space
- Grand opening
- Basic functionalities in place to operate

Step II – 2018 (medium term)

- Secure larger grant, perhaps \$50,000 - \$100,000
- Purchase & implement STEM program
- Hire professional staff
- Offer short & long term courses
- Look into opening a science school (grade 7 – 12) in Kabul next to the museum – the first of its kind
- Create science societies
- Start science fairs
- Get its own not for profit status under museum's name

Step III – 2019 (long term)

- Secure large funds of \$500,000 +
- Work toward an endowment
- Purchase professional level technology
- Hire scientists

The museum so far has invited 7 schools in the month of August (2017) to visit, each one bringing 10+ member. A Rotary sponsored all girls school & brought over 50 girls. In total, the museum has served over 150 children & adults in 2 days of exhibitions. The museum needs advertising to attract more customers.

So far, we had some moderate media coverage. Voice of America's Dari programming actually covered us both in radio & TV. AlJazeera also covered us in English language but have not aired their program yet.

full **VOA TV** program of which 2 min is the museum - Aug 27.17

FLOOR PLAN & MUSEUM OPENING DAY

1205 sq ft Museum space

Museum map

Lf to Rt– Ramee Javid, Basir (board member), Nazari - secretary, Luke Beer - past president, Stanikzai - president, background Hashmat - Creative Director

Cake celebrating opening of museum

Physics desk – working wt magnets

Chemistry desk – making of a volcano with donation

Physics section – gravity demonstration

Geology section – water drainage & flood demo

Outside the astronomy room

Operation section next to biology room

Astronomy room

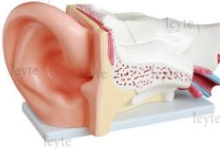

Biology room

IMAGE	QUALIFICATION	SALARY
	Hashmat "Matt" Safa He is an accomplished foreman for construction, gifted chef and creative designer. He has been instrumental for the museum	\$250 / month Creative Director His mother got really sick so he quit his job to care for her. She died recently and he had to deal with everything. His regular job paid \$800. I asked him for a pay cut till end of Dec 2017 to work with us while also tending to his own business.
	Jilani Paikar Has a BA in Geology and valedictorian of his class in college. He used to work for a construction company before moving to Kabul. His previous job paid him \$500 / mnt. He is very smart and knows basics of science.	\$100 / month Director of Education
	Farid Nasiry He is the manager of the building and my most senior employee. Currently he is studying to be assistant dentist	0 General Manager Works for museum for free.
	Jawid Ghaznawi Very hard working and fast, Jawid is a jack of all trades. He is best when making deals and getting something done. He works free for the museum.	0 Logistics Manager
	Rameen Javid Rotarian Masters in Near Eastern Studies	0 Founder
	Arezo Kohistani MA in Public Policy & Admin Univ of Massachusetts Lives in SF and helps with experiments and overall look and feel of the museum.	\$200 / mnt Senior Advisor

ITEMS WE BOUGHT SO FAR

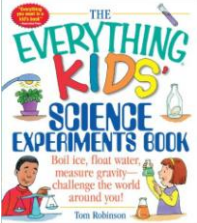

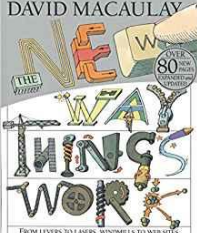

The equipment we bought so far are from 3 websites and what ever else we bought in Kabul. We have all the receipts.
