Basic education and literacy is one of The Rotary Foundation's six areas of focus. We know that basic education and literacy are essential for reducing poverty, improving health, encouraging

community and economic development, and promoting peace.....

Consider these facts:

1. If all women completed primary education, there would be 66% fewer maternal deaths.
2. A child born to a mother who can read is 50% more likely to survive past the age of five.
3. If all students in low-income countries left school with basic reading skills, 171 million people could be lifted out of poverty, which would be equivalent to a 12% cut in world poverty.

Right now, there is someone you know in the Rotary world – in your club, from a project you've worked on, in a Rotary Fellowship or Rotary Action Group – who could use a little more of your time and attention. Rotary is this great gift of global friendship, and that also means being there for each other.

Discovering the human connections that bind us is what we do through our membership every day. It's what Rotary has always been about, and we can build on it by helping each other find peace at home.

We need to learn how to ask not just "How are you?" but also "How are you really?" By doing so, Rotary can continue to *Create Hope* in the World.
