#### 9. Summary –

##### Purpose

The Interact Club of The Lodge School intends to undertake a project that can wholly benefit the school. This project involves the development of a ‘Green Space’ which seeks to promote environmental wellness and awareness, and by extension, invite all students to be active participants in creating an environmentally friendly school and ultimately, an environmentally friendly world. It is the intention that the space becomes a legacy project which would be a trademark of the school for years to come.

##### Objective:

One objective of the project is to educate the younger generation on environmental issues and nurture them into becoming sustainability pioneers in their communities. The intention is to create a space that is not only visually appealing, but also benefits the environment in some way.

These benefits include:

- the recycling of materials
- reusing materials for seating

- capturing and reusing water
  - and protecting and attracting wildlife.
- Following are the other segment headings:

- Benefits of a Green Space
- Location
- What will the Green Space include?
- Partnerships
- Sustainability
- Timeline
- Recognition of contributions

The excellent and thought-provoking presentation was roundly applauded especially by those who attended.
