research interests include user-facing development, healthcare information systems, and artificial intelligence.

Generative agents have made an impact across multiple industries and have forced re-evaluation of how creative and technical work is performed by humans. This talk will focus on the history, development, and capabilities of generative artificial intelligence followed by a discussion on the implications of this technology across multiple industries including education, writing, and software development.

the 4way test

Of the things we think, say or do

1. Is it the TRUTH?
2. Is it FAIR to all concerned?
3. Will it build GOODWILL and BETTER FRIENDSHIPS?
4. Will it be BENEFICIAL to all concerned?
