

# Mama Respond International

## A special need-ed update

On July 19th, we broke ground to build the only special needs education unit in Kitengela.

What's even more impressive is that it's built at a public school, so education will be free. This is incredibly important because most mothers of children with disabilities are often single mamas & earn very little.

Free education gives families a financial break allowing mamas to seek employment.

### **40 Locals Employed**

Our project has employed a total of 40 people so far.

On top of this, we are proud to announce that our contractor has employed one of our beneficiaries. It's incredible how things come full circle.

We have also employed a supervisor to ensure efficient reporting, documenting and overseeing of the build.

## Collaboration

**Applecross Rotary Club  
Rotary Club of Embakasi  
Noonkopir Township Primary School**

Partnerships are at Mama Respond's core.

We are proud to partner with two Rotary Clubs & receive support from several others, & maintain strong relations with the school.

We are successfully managing two builds in collaboration with these teams.

## Walling & Roofing

### Things are taking shape

Our contractor specialises in precast panels. This has reduced our build time by half & vastly reduced the cost of the build.

Both contractors are at the roofing phase. We expect to complete the build at the end of December. After that, we begin the fit out - also sponsored by our collaborative team and Rotary Foundation.

**If you would like to know more about our special needs unit, Mama Respond, or how you can get involved, please contact Erin**
